PROFILE

Full-stack developer, 28 years old, with 4+ years building and shipping production web and mobile applications end to end — secure REST APIs (Spring Boot, Django, Node.js) on Google Cloud, Next.js/React web apps, and Flutter apps published on Google Play and the App Store. Currently building fintech / mobile-money solutions at eCash, including financial reconciliation and reporting tools, and delivering client projects remotely with moon.mr. Additional background in application security (penetration testing, OWASP, JWT-based authentication).

PROFESSIONAL EXPERIENCE

Full-Stack Developer & Penetration Tester · eCash (Rassidy) Jul 2024 – Present
Fintech / mobile-money company

- Develop new services and features for **Rassidy** and **eCash**.
- Soyole** — built and published a mobile app on Google Play & App Store. Flutter
- Rassidy Calculator** — web tool for processing and reconciling transaction journals and generating financial reports. Next.js · Express/TypeScript on Google Cloud
- Mauriculate** — web tool automating financial reconciliation and closing-balance calculations.
- Built the company and product showcase websites. [ecash.mr](#) · [rassidy.mr](#)
- Perform penetration tests and security audits (OWASP) on the Rassidy application.

Full-Stack Developer · moon.mr Mar 2025 – Present
Part-time — end-to-end design, development and store publishing of client products

- الموريتانية – El Mouritania** — official mobile app of Télévision de Mauritanie (national broadcaster). Flutter · Google Play & App Store
- MPG Attendance** — complete attendance-management platform: JWT-secured REST API, admin web app and mobile app. Django REST Framework on Google App Engine · Redis · Next.js/TypeScript · Flutter · Google Play & App Store
- Royal Oasis Resort** — resort website with booking system. React/Vite · Tailwind · Node.js/Express · PostgreSQL · Google Cloud [royaleoasisresort.com](#)
- Tenadi Tours** — travel companion app for flights and destinations. Flutter · published on Google Play & App Store
